EDUCATION

Bachelor's Degree in Computer Science – Universidade Anhanguera, Marte Campus (2020 – 2023)

English Course – Wizard Idiomas (2010 – 2016)

PROFESSIONAL EXPERIENCE

Eduxe

Position: Software Developer (Jan 2024 – Present)

The company had products used by around 200 clients but required modernization and greater stability.

Responsible for restructuring and optimizing critical systems, improving user experience, and implementing automations.

- Modernized the *Eduxe Class* and *Eduxe Go* systems, introducing new features and fixing long-standing bugs.
- Developed automations in **Python/MySQL**, reducing manual work and accelerating internal processes.
- Introduced **DevOps tools** such as AWS CloudWatch and Grafana to enhance system performance and observability.
- Played a key role in implementing the **DevOps** and **Sustaining Engineering** sectors for *Eduxe Class*, increasing product reliability.
- Reduced critical incidents by approximately **40%** and improved overall system stability.
- Enhanced the **end-user experience** through functional and usability improvements.
- Promoted understanding of **best practices in version control tools** such as Git across the team.

Eduxe

Position: Software Development Intern (Jan 2023 – Dec 2023)

The company needed to improve the performance of its main products (*Eduxe Go* and *Eduxe ERP*) and migrate data between systems.

- Developed and optimized **microservices** to improve scalability and modularity.
- Implemented **webhooks** and new layout features for *Eduxe Go*, enhancing the user experience.
- Facilitated **data migration** between systems (*SIGAA* → *Eduxe*) using automation scripts.
- Improved the UI with features such as a **zoom modal for photos and files**, inspired by modern web apps.
- Increased data migration efficiency by reducing failures and execution time.

Eduxe

Position: Operations Intern (Sep 2022 – Jan 2023)

- Direct interaction with clients and **MySQL database maintenance**.
- Created official **database documentation**, improving team productivity.
- Built a **Java tool** for generating navigable database documentation.
- Increased clarity and operational efficiency for the development team.

Web Designer (Freelancer)

Position: Freelancer (Feb 2020 – Sep 2022)

Worked on client projects handling all aspects of design using **Adobe XD** for prototyping, **HTML/CSS** for layout, and **JavaScript** for interactivity.

Also developed **WordPress-based CMS** websites for clients' institutional projects.

TECHNICAL & SOFT SKILLS

Languages & Frameworks: C#, SQL, Python, JavaScript, PHP, Laravel MVC, Vue.js, .NET MVC

Technologies: Microservices, WebHooks, Pandas, SQLAlchemy, Selenium, JSON

Operating Systems: Windows, Linux, MacOS

Version Control: Git, GitHub, Bitbucket, GitLab

Cloud & DevOps: AWS CloudWatch, AWS S3, AWS EC2, AWS Route 53, Docker, Kubernetes, Grafana, Bash, Nginx, Observability, Agile Methodologies

Databases: MySQL, MongoDB, SQLite, PostgreSQL, Redis

Soft Skills: Proactivity, Teamwork, Knowledge Sharing, Problem Solving

COURSES & CERTIFICATIONS

- **Kubernetes Essentials – LINUXTips** (2025)
- **Oracle Certified Foundations Associate – Oracle Academy** (2025)
- **SQLite – Origamid** (2025)
- **MongoDB – Udemy** (2024)
- **Python from Beginner to Advanced – Udemy** (2024)
- **Vue.js 2 Complete Course – Origamid** (2025)
- **MySQL Complete Course – Udemy** (2023)
- **C# for Beginners – Udemy** (2023)
